

LIFE18 ENV/IT/000201 E-VIA

Electric Vehicle noise control by Assessment and optimisation of tyre/road interaction

IV Monitoring visit

Agenda

- 10:00 - 13:00 Technical presentation
- 13:00 - 14:30 Lunch Break
- 14:30 - 16:00 Administrative and financial session (*)

() the administrative and financial part could be much shorter than expected.*

Notes from the Project Monitor:

As this is LIFE E-VIA last monitoring visit, for the technical session, in addition to the presentation of all the actions, it is **STRONGLY REQUIRED** to focus on the expected and achieved results. Please directly compare what was expected in the grant agreement with the actual results. Also relevant at this last stage is the state of development of the business plan (cited in the paragraph “follow-up market oriented” action B8), of the exploitation plan (Deliverable of action B8, CRD) and the environmental impact and policy implications. As far as dissemination is concerned, also statistics from the website and social media are requested. It is essential, when the individual actions are presented, to **clearly delineate the expected results (from grant agreement) with those actually achieved, avoiding repeating slides already shown or describing activities already presented**.

Documentation to be prepared before the visit:

- a) Document with answers to the last letter from CINEA dated 18/03/2022.
- b) Updated consolidated and individual financial forms.
- c) All deliverables as at the date of the visit (if ready):
 - Action B.2: Report on prototype implementation and tyre/road noise performances (UNI-EIFFEL)
 - Action B.3: Report about the implementation in the pilot area (FIRENZE)
 - Action B.4: B4 Report (I-POOL)
 - Action B.5: B5 Report (VIENROSE)
 - Action B.6: B6 Report (I-POOL)
 - Action D.1: 3 Press conference (FIRENZE/VIENROSE)
